MOBILE APPLICATION DEVELOPMENT RULES

Phases:

ONLINE SUBMISSION: Every team has to register and submit their idea online.

APPLICATION SHOWCASING: In this phase selected teams will showcase their developed application or prototype based on the idea on the event days.

Rules and Regulations:

1. **The application must be based on Android or iOS or Windows platform.**
2. **Each team cannot submit more than one idea.**
3. **Among the submitted ideas, a fixed number of ideas will be selected and declared in the "IUT 9th ICT FEST 2017" Facebook page and event. The selected teams then need to perform the final registration by sending the registration fee within a given period of time.**
4. **If all the selected teams from the main list do not perform the final registration within the specified time, their chance of final registration will be canceled and a second list of selected ideas will be declared in the "IUT 9th ICT FEST 2017" Facebook page and event. The selected teams in the second list will be given a specified time within which they need to perform final registration by sending the registration fee.**
5. **Only registered team members are allowed to showcase their applications. No substitution is permissible.**
6. **The application can be fully developed or a prototype. In both cases, the developed app must be relevant to the submitted idea and will be able to perform all the features that are described when submitting the ideas.**
7. **The team members must be undergraduate students of any university.**
8. **Each team can have maximum 4 members. The member can be from same/different institution.**
9. **Participants are requested to bring their Identity Cards of respective institutions.**
10. **Teams must remain present on both days of the fest as per event schedule.**
11. **Any type of misbehavior with the judges will result in disqualification.**
12. **The organizing committee holds the right to disqualify any team.**
